Fullstack dev
SveteKit, NodeJS, Html, scss, Docker, Gitlab, Figma

WEAVUP   2021
Fullstack dev,
Html, Css, Javascript, WLanguage, WebDev

PROJETS

FICHES & CHIPS   Vue/Phaser/Node
Student project that focuses on developing a web platform for
online tabletop role-playing games (RPGs). I joined the project
during its development phase and contributed to the front-end
development and design of Fiches & Chips.

Shotass   Unity/Photon/VR
A competitive virtual reality (VR) game that allows players to assume
the role of powerful mages and engage in intense battles where the
objective is to hit targets located behind their opponents.
It's specifically designed for the Meta Quest VR.
